

T&S Industries, Inc. Shell Catchers

CURRENT CATALOG

ONLINE VERSION

#DateFormat(Now(),'DDDD MMM DD YYYY')#

Introduction

T & S Industries, Inc. manufactures all of our shell catchers in the U.S.A. and we have been in business since 1972. Our T&S Shell Catchers are made of high quality spring steel and/or super strength plastic. They snap on and off with no modification to the gun. Some of our models are all spring steel with a black Teflon type finish of TFE and others are super strength plastic and most have a spring steel insert molded into the catcher.

The T&S Shell Catcher One Year Limited Guarantee

Replacement of the merchandise of any defective merchandise within one year of date of purchase. Merchandise must be returned to T&S Industries, Inc., prepaid, and not modified along with dated proof of purchase.

NOTE: *Shell Catchers for other guns or gauges than those shown on this web site are **NOT** manufactured or available. If the **EXACT** gun model is not listed on this web site, we **DO NOT** make a T&S Shell Catcher for it.*

*It is simply **NOT** economically feasible for us to make a shell catcher for guns where **TRAP** and **SKEET** models are not manufactured - **NOT** enough demand for the investment it takes.*

Since we do not own one of every model shotgun made, we are not able to tell if any of our shell catchers can be modified for other guns or will fit other guns.

CONTACT: Please do not expect an Email response when asking if we have a shell catcher that will fit some other gun model not listed.

Benelli™ is a registered trademark of Benelli USA. Beretta™ is a registered trademark of Beretta USA. Browning™ is a registered trademark of Browning. SKB™ is a registered trademark of SKB Shotguns.

T&S Shell Catchers snap on and off with no modification to the gun. T&S Shell Catchers are available in three different types:

- Spring steel with TFE finish
- Super strength black plastic
- Super strength black plastic with steel insert

Our T&S Shell Catchers are used for catching single shells ONLY.

The loaded shell is placed in the gun for firing by placing the brass end first, into the ejection port just ahead of the T&S Shell Catcher. The brass is aligned to the rear so the loaded shell lies on the carrier inside the receiver. When the shooter is ready to shoot, he closes the bolt with the Action closing button and the carrier raises the shell while the bolt pushes the loaded shell into the firing chamber. After firing, the empty shell can easily be removed from the front end of the ejection port and placed into the shooters vest/pouch/shell bag, etc.

Pricing

All prices are in U.S. currency and subject to change without prior notice. PayPal will make currency exchanges when ordering.

(Shell Catchers for other Benelli guns or models or gauges than those listed below are not available. This shell catcher will NOT work on any other Benelli models.)

GUN MODEL	GAUGE	NOTES	TYPE	CAT #	PRICE
M1 Field RH	12		Super strength Black plastic with steel insert	TS-S90	* (see footnote)
Super 90 RH	12		Super strength Black plastic with steel insert	TS-S90	* (see footnote)
Montefeltro RH	12		Super strength Black plastic with steel insert	TS-S90	* (see footnote)
Std. Sport RH	12	Will NOT work on Super Sport, Sport II, or others	Super strength Black plastic with steel insert	TS-S90	* (see footnote)

* Due to the limited demand for this model it is made from a modified TS-AL2 Shell Catcher and requires a small notch in the bottom of the bolt handle to clear the Shell Catcher as it operates. The notch is about 0.040" deep and almost invisible when the bolt handle is installed. The cost of the bolt handle is rather expensive and therefore the only way we can offer this model is to have the consumer send their bolt handle to T&S Industries, Inc. for exchange @ **\$26.95 + \$3.98 S&H.**

The handle should be sent in a package that will arrive safely. Insurance is recommended. We can not be responsible if it does not arrive in tact. Due to the custom nature of the model please allow up to three weeks for delivery.

T&S Industries, Inc. reserves the right to not exchange bolt handles that are not in excellent condition. We cannot exchange or modify the completely ROUND Benelli™ Bolt Handles for use with a T&S Shell Catcher. Camo painted bolt handles have been discontinued and we do not have any available for exchange, therefore, it may take 3-4 weeks for modification of camo bolt handles. If you send us a handle that shows any wear, we will modify it (3-4 weeks) instead of exchanging it with a near new condition handle. While your handle is gone, you may use a blunted nail in place of the handle to open the bolt when arriving at the range. At other times at the range, your gun should stay open for safety until you are ready to return home.

Beretta Shotguns™

Visit the [Beretta Shotguns USA's web site](#)

All prices are in U.S. currency and subject to change without prior notice. PayPal will make currency exchanges when ordering.

All Shell Catchers are BLACK.

(Shell Catchers for other Beretta™ guns/models or gauges than those listed are not available)

GUN MODEL	GAUGE	NOTES	TYPE	CAT #	PRICE
AL2	12		Super strength black plastic with steel insert	TS-AL2	\$15.95
A301	12		Super strength black plastic with steel insert	TS-AL2	\$15.95
A302	12		Super strength black plastic with steel insert	TS-AL2	\$15.95
A303	12		Super strength black plastic with steel insert	TS-AL2	\$15.95
AL390, AL3901	12		Super strength black plastic with steel insert	TS-AL2	\$15.95
AL391 - Urika, Urika 2 & Teknys	12	w/Action Closing Lever - Makes pushing the action closing button a breeze! Much easier on the fingers!!!	Super strength black plastic with steel insert AND INCLUDES AN ACTION CLOSING LEVER TO MAKE PUSHING THE BUTTON A BREEZE.	TS-391L	\$22.95
AL391 - Urika, Urika 2 & Teknys	12	Catchers made after 2006 also fit the 12 Ga Teknys	Super strength black plastic with steel insert	TS-A391	\$15.95
AL391 - Urika & Urika 2	20		Super strength black plastic with steel insert	TS-AL2	\$15.95
AL391 - Urika, Urika 2, & Teknys	20		Super strength black plastic with steel insert	TS-AL2	\$15.95
A400 Parallel Target / Sporting - RH - BLUE RECEIVER ONLY	12	w/Action Closing Lever - Makes pushing the action closing button a breeze! Much easier on the fingers!!! [This model SHOULD fit the 3" A400 XPLORE models actually manufactured in MID-2014 or later - returns accepted for purchase price refund (not S&H)]. We have found that this shell catcher may not work on the A400 XCEL BLUE receiver guns imported the first year or two into Canada and possibly other countries. Our Best guess is they will not work on these guns manufactured prior to 2013 in Canada; and possibly even after that. If you have such a gun that does not allow this catcher to fit on your BLUE receiver A400 XCEL, please return it in it's original condition for a refund.	Super strength black plastic	TS-A400	\$22.95
A400 XCEL Multitarget XCEL (Silver Receiver)	12	The NEW T&S Shell Catcher, TS-A400MT works on the NEW A400 XCEL Multitarget Silver Receiver RH gun. It is a modified TS-A400 catcher with the lever removed in exactly the correct location to work with the new A400 XCEL Multitarget.	Super strength black plastic	TS-A400MT	19.95

Winchester Shotguns™

SPECIAL DIRECT ORDER: * See note below

*We recently made a special run of the original T&S Shell Catcher for the Winchester Super X Model 1 12 Ga Trap gun. (This shell catcher will NOT fit ANY OTHER MODELS, such as the Super X Model 3, etc.) We have some of these available WITHOUT a modified bolt handle. A modified bolt handle is required if the catcher is to be used with a bolt handle in place. A sketch of the modified bolt handle with additional information is included with each order, so the consumer may have his/her bolt handle modified by a competent machinist or gunsmith in order to allow the bolt handle to clear the T&S Shell Catcher, TS-SX1. Because we have no control over this modification, we cannot be responsible for any problems resulting from this modification. Many of the Winchester Super X Model 1 Trap guns in use, already have such a modified handle (groove in the bottom side of the handle) installed because they have been used with one of the original T&S Shell Catchers more than 25 years ago. This shell catcher may not work with all Winchester Super X Model 1 Trap guns because of receiver variations. If you purchase one and it does not allow the bolt to close with a modified bolt handle, it may be returned in it's original condition for a refund (less shipping costs). This T&S Shell Catcher, Stk. No. TS-SX1, is only available directly from T&S Industries, Inc. (our address is located elsewhere on this web site) because we need to explain the required modification. When ordering by mail, the TS-SX1 cost is \$26.95 plus \$3.98 Shipping & Handling via First Class U.S. Mail or \$7.90 U.S. for International First Class Mail.

GUN MODEL	GAUGE	NOTES	TYPE	CAT #	PRICE
Super X Model 1	12	See Special Pricing Above	Super strength plastic with steel insert	TS-SX1	* (see note above)
